Meet Beastly...
He doesn't like anyone playing with his electronic cube...
except his four brothers...

Meet the rest of the Gly-Boys... Ugly, Gastly, Homely & Deadly.

The Gly-Boys really aren't such a bad lot, but they do have their quirks...in particular Cowboy (that's you) playing with their electronic cube.

It's No Picnic. Don't be fooled, getting to that cube is no easy task. With the help of a four-way joystick, you maneuver Cowboy through the brilliant blue maze in search of our "heroes".

Yes, Virginia, There Are Good Guys. What would a game full of villanous creatures like the Gly-Boys be without the courageous King and his Knights. Meet the White Knight, Red Knight and the illustrious King Rompus.

The Chase Is On. With a sound track that's contagious, the action begins. Cowboy starts his pursuit of the good guys. Laying frozen in a corner of the maze, life enters the Gly-Boys who attack from all angles. If Cowboy wants to play with that cube, he has to change the nine white circles in the center of the maze to red. That's done by carefully "rounding-up"Red Knights.

The Meter Is Running. The Gly-Boys aren't happy. Cowboy's got that cube and they can't do a thing about it... for now. That's because Cowboy has a pre-determined amount of time to recreate the exact color patterns of the sample cube which appears in the lower corner of the screen. Bonus points for success and another go-around with the cube.

It's Become A Tradition. We're extremely proud of the reputation for quality we've developed. That pride extends itself throughout our company ...and that pride reflects itself in the quality of workmanship in both the upright and cocktail table models of Round-Up.
